From the International Landscape Biennial of Barcelona, we would like to invite you to the talk that **Gilles Clément**, eminent French landscape artist, will give on the occasion of the presentation of his latest book.

This is the first event that we organize ahead of the 11th Barcelona Landscape Biennial, which will take place in September 2020.

Clément defends the observation of a landscape which is not fixed. The nature invades and it organizes a creation, without "fitting" the species and accepting the movement and changes, nothing permanent in the concept of garden. All these landscape interpretations and other concepts such as agitation (mixing of species) or planetarization (integration of globalization) are reflected in their books such as "Le Jardin en mouvement", "Le Jardin planétaire" and "The third landscape manifest".

Save the date: next Thursday, **3rd of October** at 19.00 h.
